- ➢ **Object Oriented Design**
- ➢ **Unit Testing**
- ➢ **Database Design**
- ➢ **Database Management**
- ➢ **End-User Testing**
- ➢ **Technical Documentation**

RECENT PROFESSIONAL EXPERIENCE

Becker Keating & Young Technologies   **Edmonton, AB**
Full-Stack .NET Developer   **August 2017–July 2020**
Full Stack Development || Database Design || Database Management

Recruited as a developer through connections at the Edmonton Police Service. Worked alongside two other developers as consultants for small Edmonton-area businesses. Being a small company, I wore many hats when it came to designing, developing, testing and deploying. I'm proud to have personally worked and supported numerous client projects, sometimes solely for the entire application development life-cycle.

Edmonton Police Service | Intellex Systems Inc   **Edmonton, AB**
Web Application Developer / Consultant   **May 2015–May 2017**
Quality Management || Process Improvement || Project Management

Started as an intern, but continued on as a consultant. Began work primarily as resolving bugs, I gradually gained more and more responsibility until I was the only developer permitted to work full stack on a critical multimillion-dollar project.
